

A 15-minute preliminary presentation

Important Knowledge from the Afterlife

by John Finnemore

representing

The Universal Spiritual Brother&Sisterhood

(USB)

Two Main Topics

- About Spirit World Leaders
- The Importance of Afterlife Knowledge

About Spirit World Leaders

- The evidence for an afterlife is *overwhelming* (= Step 1).
- The Spirit World structure: Realms of advancing spirituality. We will live there in the level we have earned.
- Beings of Light of the most advanced wisdom and spirituality (highest levels; leaders) wish to enlighten us (= Step 2).
- They have major concerns for humanity on earth:
 - our spiritual progress seriously lags our other areas;
 - self-interest, greed, hunger for power, barriers;
 - the resulting misery and havoc;
 - threats to all or most life on the planet from time to time.

About Spirit World Leaders, cont.

- They want us to concentrate on:
 - seeking **spiritual** truth and enlightenment, using reason,
 - living more **spiritually** from what we learn,
 - not being distracted by material interests or self-interest,
 - not being diverted by spirit phenomena and mysteries.

But they won't interfere with our free will.

- we will have to take the consequences.

How did I get involved?

- I'm a (rare) scientist interested in the afterlife (most are skeptical.) It's scientific to me.
- I started investigating about 1957 (57 years).
- I've had wonderful experiences with top-class **mediums**.
- A sister is a UK-accredited medium.
- I became specially interested in teachings from the most advanced spirit realms (very rare).
- I found a superb source of advanced spirit information.

Some Important Afterlife Knowledge

- The **purpose of this life**, and of existence, is to make *spiritual* progress. Knowing this can change our view.
- Spirit leaders define **spirituality** as:
 - the noblest part of our character,
 - having high and noble qualities of spirit.It includes: humility, sincerity, courage, universality, selfless service, expressing love, living simply, doing good.
- Besides spirituality, **knowledge** of The Spiritual Laws That Govern is also necessary to make progress. (e.g., Laws of personal responsibility, justice, service, love, attraction.)

/continued

Important Afterlife Knowledge, cont.

- In spirit life, the **mind** is *far* more powerful than on earth. (e.g., travel, construction, communication.)
- So learning **correct concepts** on earth can avoid problems later in spirit life. (e.g., spirit deafness and blindness.)
- About our spirit makeup:
 - The real self: Divine spark + animating factor + consciousness;
 - spirit bodies (we have now);
 - the aura (its interpretation).

My involvement

- In 1959 I discovered a small organization specializing in teachings from a *group* at the most advanced levels: The Universal Spiritual Brother&Sisterhood (USB). It's not a religion; it's an organization of spiritual truth. www.theusb.org. No fees.
- Its spirit teachers say "We present things as *we* find them to be."
Note: They ask us to accept only what seems right to *us*.
- It distributed its teachings in quarterly newsletters for 25 years.
- Over the years I became more involved in it. Now I'm a lead volunteer, not paid.

The USB's Official Teachings

- I was asked to combine all the USB teachings from newsletters into a book. It has 800 pages and is just completed (available here; sales benefit only the USB).
- Its 14 chapters address truth, spiritual laws, love, responsibility, spiritual progress, psychic phenomena, life on earth and in the spirit realms, and many related subject. (More information at www.theusb.org.)
- It has received outstanding rave reviews (also here and on the website).

Investigate? Discuss?

- This subject may seem specialized. But its very important to human conditions and progress. And there's a lot to it.
- There's now a steady awakening to spiritual truth from the afterlife. This knowledge is goodness, it's beautiful.
- To help *ourselves* along, and help the *whole world*, we need to investigate this and then spread light. We can all help to bring about **the new spirituality** that's coming. The USB book will help us.
- I would love to hear from anyone particularly interested in this subject. Afterwards, at meetings, or via

john@theusb.org
